Dr. Bojes, Dr. Turner, and Dr. Milton,

I would like to update Unified Command on our discussion yesterday. Pleases review the email below to ensure that I have captured everything accurately. I welcome any changes or feedback that you may have. I would like to get this to Unified Command by noon today if at all possible.

Thank you

Shaun

Good morning everyone,

Dr. Milton , myself, Dr. Bojes, and Dr. Turner discussed final confirmation sampling for (b) (6) Street yesterday afternoon. Dr. Bojes and Dr. Turner presented their recommendation for the detection level and methodology for confirmation sampling. Their recommendation to Dr. Milton was to use the OSHA Method 1003 for Phosphine Gas. The detection level for this method is 10 ppb or 13  $\mu$ g/m³. Dr. Milton has agreed to proceed with the recommendation. Dr. Turner will be coordinating with Jhana and the contractors under her supervision. At this time, we do not have a exact time estimate on the delivery of the sampling cassettes or their arrival on-site here in Amarillo. It is our understanding that Jhana, with support from Dr. Turner, will be overseeing the confirmation sampling protocol.

I have attached a link to the sampling protocol for reference - https://www.osha.gov/dts/sltc/methods/mdt/mdt1003/1003.html
